Two in one: Mountain enthusiast & Foresight expert

The art of anticipating mountain futures

Fraunhofer Institute for Systems and Innovation Research ISI

The **Competence Center Foresight** develops, implements and conducts foresight processes within business, politics and society. We view Foresight as the structured analysis of complex futures.

Our aim is to use foresight activities to strengthen the future viability of our clients and society as a whole. With the help of participatory and discursive formats, we promote the exploration of alternative developments, initiate learning processes, question thought structures and perceptual filters, and open up new design possibilities.

Our clients develop future competence (futures literacy) and are sensitized for a conscious handling of uncertainties and changes.

My passion

- The Alpes
- The Andes
- Atlas Mountains
- Carpatian Mountains
- Mt. Oko (Cameroon)
- Mt. Uarges (Kenia)
- Roraimu (Brazil, Venezuela, Guyana)

My expertise

- Horizon Scanning
- Stakeholder analysis and involvement
- Scenario and narrative development
- Environmental impact modeling
- Sustainability research and innovation

Our ambition:
Innovative and sound mountain-related future knowledge generation
