

**Evaluation of a high-resolution Numerical Weather
Prediction Model in Complex Terrain**

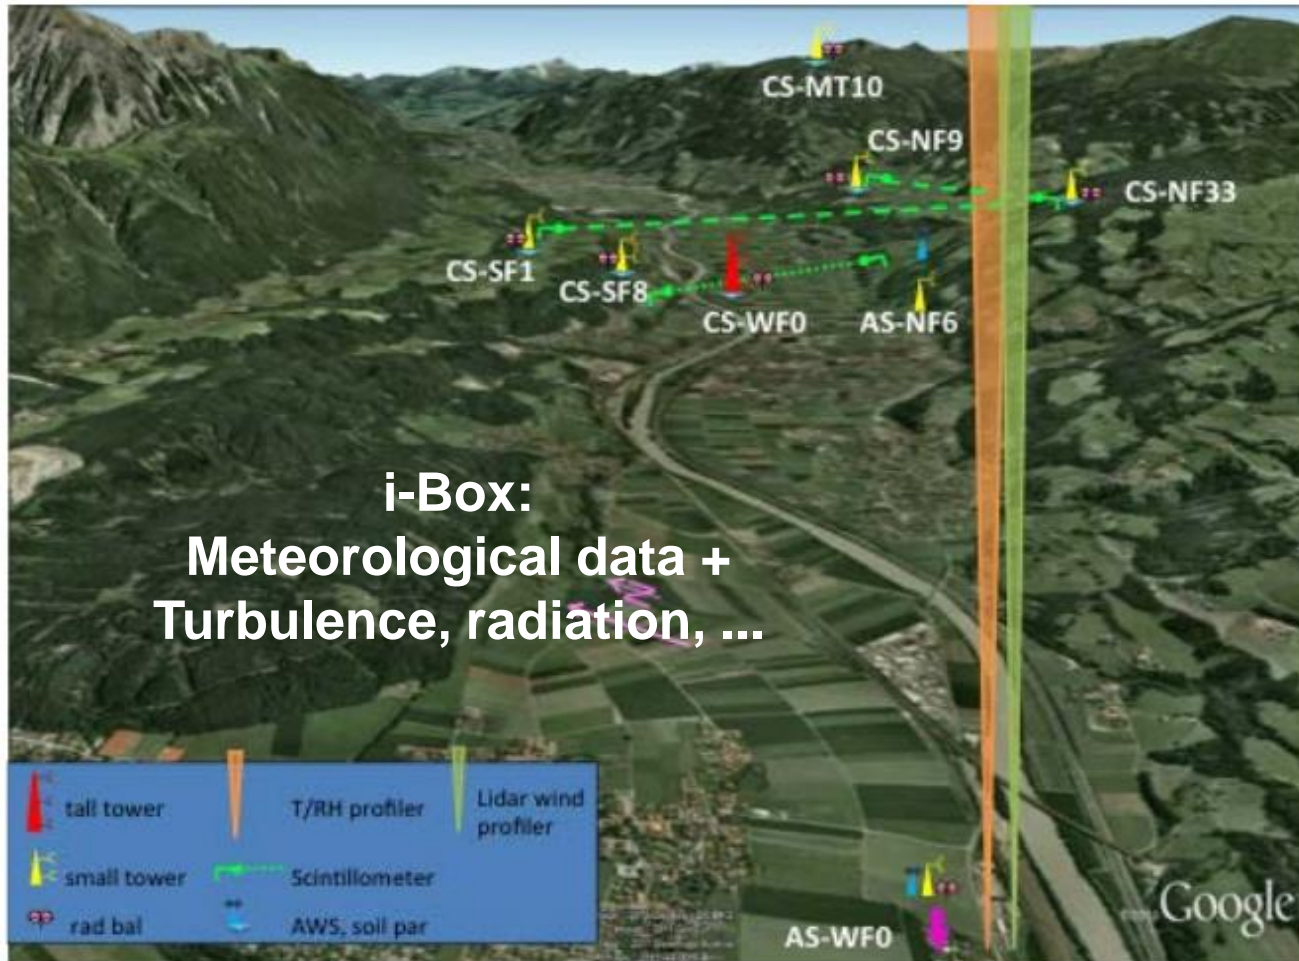

Questions:

- **For which “common” challenges could/should we („early careers“) find solutions together?**
 - Interdisciplinary challenges - joint projects, discussions
 - Scientific exchange – you never know everything
- **What difficulties to you currently face in your research project?**
 - Communication
- **What are your special skills? Where could you help other „early careers“?**
 - Numerical modeling, a bit of programming
 - Presentation of scientific results
 - Drinking tremendous amounts of coffee

Complex Terrain? - Inn Valley

The model world
