

# Reconstructing the Quaternary hydroclimate of Ash Meadow National Wildlife Refuge, USA

Kathleen Wendt, Institute of Geology

## If you are willing please answer (some of) these questions:

- For which “common” challenges could/should we („early careers“) find solutions together?

Community = support, networking, and opportunities

- What difficulties to you currently face in your research project?

Just getting started, stay tuned 😊

- What are your special skills? Where could you help other „early careers“?

Masters degree focused on U-series dating, ICP-MS operation, column chemistry
