

Meeting of DP Alpine Biology and Global Change SS 2019

Mon 3 Jun 2019 14:30-17:00 at *HSA Botanik*

AC* denotes Application Colloquium

Time	Presenter	Title
14:30-14:35	Michael Bahn	Welcome and Introduction
14:35-14:55	Katharina Ramskogler (AC*)	Short- and long-term feedback between vegetation and morphodynamic processes
14:55-15:15	Veronika Hierlmeier (AC*)	ProtectAlps- Alps, persistent pollutants and insects
15:15-15:35	Tania Holtzem (AC*)	<i>Daphnia</i> Resilience - Comparison of genomic and functional resilience of water flea populations in Lake Constance, Lake Zurich and Lake Walen under eutrophication and oligotrophication.
15:35-15:45	David Reinthaler	Drought and rewetting responses of soil CO ₂ production and emission dynamics in a future climate
15:45-15:55	Florian Oberleitner	Water use and growth responses of Norway spruce and European larch to experimental drought at the subalpine tree line
15:55-16:05	Matthias Stegner	Plant body versus air temperature in the nival zone: Winter nights during summer time
16:05-16:15	Pablo Manuel Aguilar	Bacterial diversity from high-elevation lakes and other extreme habitats
16:15-16:25	Xiaoteng Lu (Leo)	Numerical and Functional Response of Two Contrasting Freshwater Ciliates in Relation to Temperature
16:30-17:00	General discussion and updates (evaluation of DP, funding opportunities, best student paper award, structure of PhD seminar in WS 2019/20, ...)	
<i>(from 17:00 Scientist Board Meeting)</i>
