

The University of Innsbruck offers for a period of three years a

Research Position for a PhD student

at the Unit of Applied Mechanics in the Civil Engineering Department.

Qualification: Candidates must hold a Master (Diploma) Degree in civil, mechanical, or aeronautical engineering and should have a solid background in mechanics. Knowledge of methods in structural dynamics is beneficial.

Job description: Research obligations through participation in a FFG (Austrian Research Promotion Agency)-sponsored research project titled "Multi Non-Linear Structural Condition Modeling and Assessment" in the field of structural dynamics.

The annual gross salary for this position is approximately EUR 25.000,--, which allows a decent living as a PhD student in Innsbruck.
