

# Agenda

Joint FWF-ARRS Project "Identification of cosmic ray sources amongst jetted AGN"

## Tuesday, 12.05.2020

- |               |   |                                |
|---------------|---|--------------------------------|
| 10 am - 12 pm | Welcome and Introduction                | Anita Reimer, Serguei Vorobiov |
|               | Updates on Observation with PAO         | Serguei Vorobiov               |
|               | Photon real time separation within AMON | Lukas Zehrer                   |
|               | Session discussion                      |                                |
| 2 - 4 pm      | Review of FROs including average SEDs   | Margot Boughelilba             |
|               | Loss- and acceleration time scales      | Lukas Merten                   |
|               | Session discussion                      |                                |

## Wednesday, 13.05.2020

- |               |  |                    |
|---------------|--|--------------------|
| 10 am - 12 pm | FSRQ contribute to EeV neutrinos?                    | Chiara Righi       |
|               | Updates on source propagation modelling              | Lukas Merten       |
|               | Session discussion                                   |                    |
| 2 - 4 pm      | Update on MM-propagation related measurements        | Serguei Vorobiov   |
|               | Multi-messenger propagation from FRO catalog sources | Jon Paul Lundquist |
|               | Session discussion                                   |                    |
| 4 - 4:30 pm   | Closing discussion                                   |                    |
