

**11.03.2020**

**Prof. Dr. Eugen Rott, Universität Innsbruck**  
Regenwälder und Küsten in Queensland, Australien

**18.03.2020**

**Dr. Karin Glaser, Universität Rostock**  
Terrestrial algae in biological soil crusts - research area with potential for detection of interesting new species

**25.03.2020**

**Nicola Alessi, MSc, Universität Bozen**  
Surface trade-off between the largest Italian glacier and vegetation: A thirty-year time-series of remote-sensed imageries

**22.04.2020**

**Prof. Alma Balestrazzi, Universität Pavia, Italy**  
Seed quality examined through the lens of genome integrity

**29.04.2020**

**Prof. Dr. Hanno Schäfer, TU München**  
Speciation processes in the Azorean flora

**06.05.2020**

**Denis Kutnjak, PhD, Ljubljana, Slowenien**  
Deciphering deep sequencing data to investigate diversity and evolution of viruses infecting plants

**27.05.2020**

**Dr. Gerhard Wieser, BFW Innsbruck**  
Treeline - quo vadis?

**03.06.2020**

**Loïc Rajjou, PhD, AgroParisTech, IJPB, Institut Jean-Pierre Bourgin (INRA, Université Paris-Saclay)**  
The molecular control of seed germination

**17:00 Uhr – Hörsaal A – Institut für Botanik**
