

The world inside the classroom

In one of our English lessons, Tamar Tembeck presented her work with Dr. Clown in Montreal hospitals, long-term care facilities and rehabilitation centres.

Her job is to brighten up the lives of sick and handicapped people, especially children and the elderly. She told us that she likes what she is doing. When she goes to see the patients in hospital, she wears a red nose and transforms into “Dr. Boom-Boom”. In this organisation, all clown doctors adopt personalities of different superheroes.

Tamar Tembeck also showed us an excerpt of a documentary on the subject and both, her presentation and the discussion with her were really interesting. In the end, Tamar even showed us one of her performances. (Bernhard Reitshammer, 5A)

Tamar Tembeck, a therapeutic artist and PHD in residence at the Künstlerhaus Büchsenhausen

Class 5 A after the presentation some talents for this profession have been discovered

Tamar Tembeck has been working as a therapeutic artist

We thank the Department of Canadian Studies for their valuable liaison work.
