Methodological considerations

- Culture?
 - region = language = culture?
 - structures & traditions?
 - values & attitudes?
(how to handle differences)
- (Regional) development? regional change?
 - UNDP: HDI? EU: LSI?
 - economic indicators?
 - demographic indicators?
 - land use? ecological indicators?
- Sustainable regional development?
- Relations between Culture & Regional development?
- Differences among and/or within nations?

Data Infrastructure for the Alps: Mountain Orientated Network Technology

1. Methodological considerations
2. Enquiry & national reports
3. Results
 - Influence of formal cultural factors (Q VI)
 - Influence of specific values and attitudes (Q VII)
 - Strategic aspects of regional policy (Q II)
 - structures, tasks and objectives
 - main approaches and governance
 - relation between intra- and extra-alpine realm
 - trends and future orientation

The experts view: Different approaches to regional policy in the Alps (Q I)

Approaches / Characteristics	A	F	D	I	SL O	CH
importance of "territorial geometry" (e.g. level of decentralization or urbanization), administrative structures		X		X	X	X
centralized vs. decentralized political and administrative structures, influence of the central state authorities, type of governance: top-down or bottom-up (F & I vs. D-A-CH)	X	X		X		
"Latin" approach (in F & I) vs. approach in D, A & CH				X		
perception of the Alps, meaning or importance of Alpine perspectives, in relation to the territorial structure (" <i>Alpenzentrismus</i> ", " <i>Alpenmythos</i> ")			X	X		
formalized planning procedures vs. case-to-case decisions (CH / A)	X					X
tremendous regional diversity, gradient between centres and periphery (I & SLO)				X	X	
importance of urbanization, neglecting the rural areas (SLO vs. CH & A)				X	X

Conclusions

Concluding, we remark that the traditional influences of most cultural factors on regional development are decreasing (while still intuitively present in our perception), leaving an open trail to a generalized development, which generates its peaks and shallows more from globally determined location qualities (like easy access and urbanization, i.e. along the village-metropolis gradient) than from local or regional culture, which in itself tends to become more uniform. Traditional cultural differences then are more an expression of time lags and bound to diminish on the long run.

Conclusions (cntd.)

This in turn is a clear signal to DIAMONT: For monitoring regional development in the Alpine Convention context we must not spend too much effort on indicators based on traditional cultural differences, but more on indicators measuring sustainable progress in a globalizing world, based on attitudes and values.

However, this may well include information on regional identity, provided it means not a mere leftover from times past or folklore, but a conscious profile and strategy to future challenges.
