

Status Quo of WP12

Characteristics of the cooperation with SOIA

Fourth project meeting in Grenoble on 25th/27th of January 2007

Ulrike Tappeiner

SOIA - DIAMONT

- 1. Application form: SOIA will provide the data needed in DIAMONT**
- 2. Project time:**
 - close co-operation with the AC established by concrete involvement of Ruggero Schleicher Tappeser, acting Secretary General (scientific board, regular contacts within WP 12)
 - Cooperation agreement between DIAMONT and the Permanent Secretariat of the Alpine Convention (PSAC) Sept. 2005

what are the problems?

- Until now: no really useful data form the AC, therefore very time (and money) consuming data collection in WP 8
- Personal changes by the AC:
 - Marco Onida new Secretary General
 - Regula Imhof new Vice Secretary General (starting with April - May?) and responsible for SOIA
 - Ruggiero as Consultant of the PSAC and/or leaving AC soon?
- Unclear situation with the “Munich-Databank “

solutions

1. Missing data transfer:

- official permission to use the RSA data from D, A, F, CH, I => too late for WP8 work
- collection of all used data by the DIAMONT team (with the help of GALPIS and partners)

2. Personal changes by the AC:

- Axel & Ulrike will meet Ruggero in February to discuss how DIAMONT could be introduced to the new representatives (Ruggero will inform Onida and Imhof about DIAMONT)
- Meeting with Regula Imhof (and Marco Onida?) as responsible for SOIA with the DIAMONT representatives (planned, has to be fixed)

3. Common Databank SOIA / DIAMONT??
