## Sustainable development - conceptual framework

### Main objectives of sustainable development (principles 1, 3, 11)

- Rights for development, environmental protection and health
- Equity between generations
- Equity within generations

Co-funded by:

Bundesministerium  
für Umwelt, Naturschutz  
und Reaktorsicherheit

Bayerisches Staatsministerium für  
Umwelt, Gesundheit und Verbraucherschutz

meeting Grenoble 25.-27. 1.2007

## Sustainable development - conceptual framework

Main concepts of the focus

Main concepts of implementation

Position of DIAMONT ?

Co-funded by:

Bayerisches Staatsministerium für Umwelt, Gesundheit und Verbraucherschutz

meeting Grenoble 25.-27. 1.2007

## Basic Models

## Normative frameworks at different levels

### 1. Overall framework in terms of

- Convention on Sustainable Development
- Alpine Convention

Deductive approach from clear perception of a common problem

- + partly transferable to other situations
- risk of misinterpretation of local situations

### 2. Common project framework in terms of the DIAMONT focus

- Provides a common qualitative starting point for all test regions

### 3. Specific framework in the test region

- Development by stakeholders and citizens
- Support by DIAMONT data & indicators (?)
- Comparison with the framework of level 1 and 2

Inductive approach from specific local situation, backed up by relevant local policy objectives

- + specific and applicable
- not transferable

## What is sustainable regional development ?

Sustainable Development is development,

- which covers present needs without compromising needs of future generations
- means guarantee of living conditions in the sense of human rights by creation and maintenance of a high number of life style options
- Fairness within and between generations in terms of the use of ecological, economic and social resources
- Comprehensive protection of biological diversity (ecosystem diversity, species diversity, genetic diversity)
- Long term equity between ecological, economic and social objectives

meeting Grenoble 25.-27. 1.2007

## Some suggestions for objectives at project level

Objectives may be suggested for the focus of the project only

- Reduction of unemployment with measures that are at the same time socially acceptable and sensitive towards the issue of increasing land take.
- Priority in regional and municipal policy for branches producing a high ratio of added value per spatial unit under the precondition that traditional and local economic structures are maintained as well.
- Decoupling of growth and space consumption, i.e. creating more added-value on the same amount of commercial area, providing appropriate housing opportunities to more people on the same amount of residential land through redensification
- Increase environmental quality in densely populated areas by reducing noise nuisance and improving safety measures against existing and unavoidable noise immissions.

Umwelt, Gesundheit und Verbraucherschutz

meeting Grenoble 25.-27. 1.2007

## Starting points for discussion

- Is there a focus of SD we would prefer ?
- Which implementation concept are we in favour for, strong or weak sustainability ?
- How many dimensions of SD do we follow ?
- What is the focus we would like to look at, „control of land use“, LRM ?
- Which normative framework do we refer to ?
- How is regional sustainable development then defined ?
