

Outcome Recording Sheet for 'Will I survive'

Please discuss this together and fill one in for each class

1. How many plants played this game?

2. How many plants disappeared in your game?

	List of species that disappeared	Cause of the extinction	Natural or human cause	Plant distribution (local vs. global)
1				
2				
3				
4				
5				
6				
7				
8				
9				
10				

3. Which species gained sites? How many are they?

the following plant/s	gained	site/s
the following plant/s	gained	site/s
the following plant/s	gained	site/s

4. Which species lost sites? How many are they?

the following plant/s	lost	site/s
the following plant/s	lost	site/s
the following plant/s	lost	site/s
the following plant/s	lost	site/s

5. Does it make any difference if a common plant disappears as opposed to a rare plant?

If a species that lives only in your area vanishes, this species vanishes also from

If a species that also lives in other parts of Europe vanishes locally, it might still be growing in

Which of the two events above is the most serious? And why?

6. Some species also increased in numbers! They are termed 'invasive' plants! Can you explain why the same events that make some species disappear, make invasive species spread far and wide?

7. Do the human actions in this game only ever damage plants? Are there ways in which humans protect nature?
