

University of Innsbruck

The FWF doctoral programme (Doktoratskolleg) W1227 "Computational Interdisciplinary Modelling" (Speaker: Prof. Dr. Sabine Schindler) at the University of Innsbruck in Austria is bringing together mathematicians, computer scientists, engineers and physicists within an interdisciplinary framework to develop and apply methods and models for innovative computational approaches to scientific problems.

At the Institutes for Mathematics, Computer Science, Astro- and Particle Physics, Ion Physics and Applied Physics, and Civil Engineering, which are participating in the excellence doctoral school, several research positions (for three years) are available starting around Autumn 2010:

20 research positions for doctoral students in all participating fields

A detailed description of the various scientific projects within the programme can be found at <http://dk-cim.uibk.ac.at/>.

Applications including a CV, publication list, two letters of reference and a brief description of research interests should be submitted electronically (pdf<4MB) to Dr. Marco Barden (dk-cim@uibk.ac.at) until 30.04.2010. Also, general questions regarding the doctoral programme can be directed to Dr. Marco Barden, e-mail: dk-cim@uibk.ac.at, phone: +43 512 507 6034.

The University of Innsbruck aims at establishing gender equality and highly encourages women to apply.

Handicapped applicants with identical qualification will be considered with priority.
