# Rationale, vision and objectives

---

- Increasingly recognized the climate change adaptation (CCA) is a complex and interwoven process.
- CCA is indispensable for sustainable development (cf SDG's) and crucial to reduce negative climate change impacts and risks.
- Knowledge and education are critical resources for CCA.
- The current engagement of research with CCA practice shows important limitations
- Comprehensive teaching curricula at the university level are missing in many countries, including in mountain countries of the developing and developed world (incl Switzerland).

Our **vision** is to develop and maintain over the long term an **active international network of academic institutions** in the field of CCA. The network engages in **innovative and impact-full research and education** that is salient to the needs for achieving sustainable development.

Our **objectives** are to use a **joint knowledge production (JKP)** approach in education and research to advance the production and dissemination of knowledge on CCA, its application in policy and practice, and related capacities.

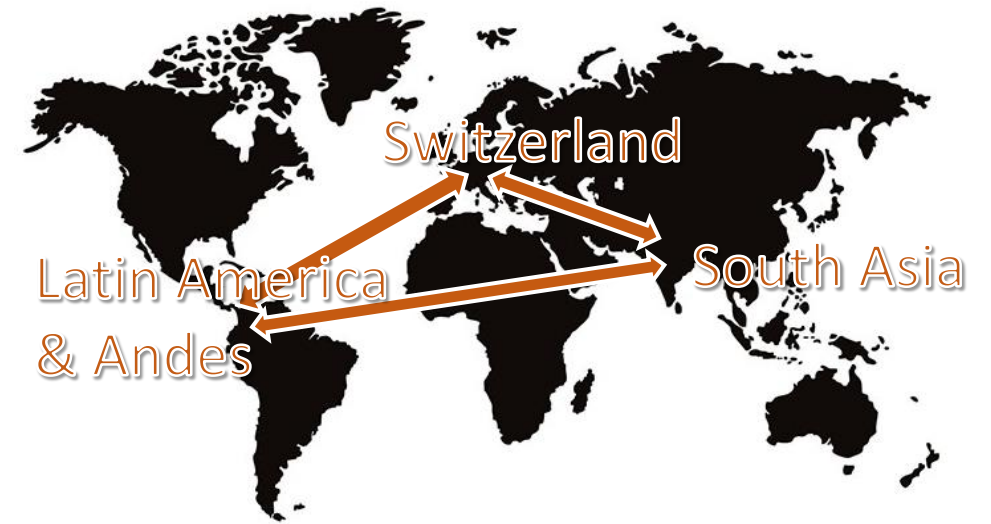

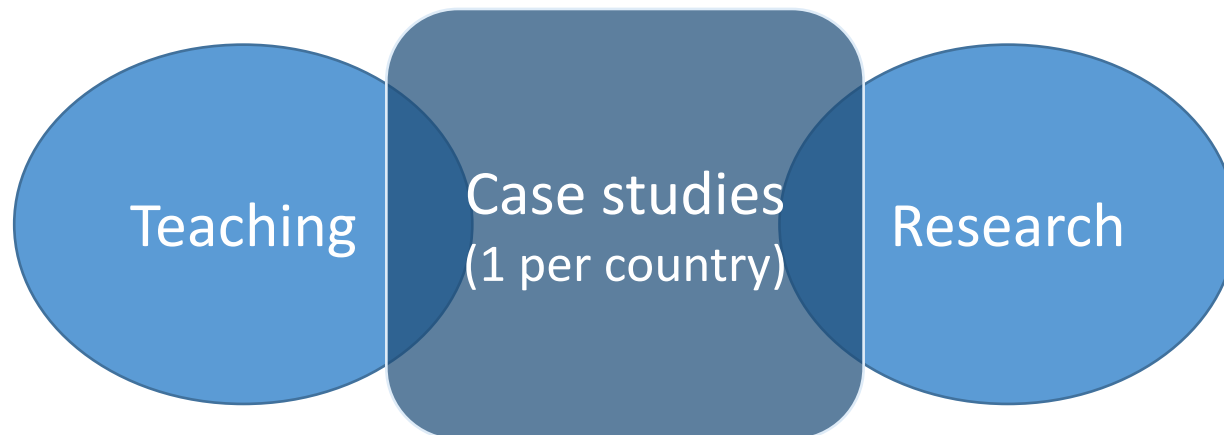

## The network: *knowledgeforclimate.net*

---

A core consortium of 4 Swiss and 5 international institutions, with a focus on the tropical Andes and the Himalaya region. Over the mid- to long-term we seek to extend the network, to strengthen and diversify disciplinary, interdisciplinary and regional capacities.

Case studies are a central element for both teaching and research.

# knowledgeforclimate.net: Tools

---

An education platform is in development with 3 elements:

- Methods
- Tools
- External resources

Input, links, ideas, collaborations welcome!

[Home](#) [News](#)

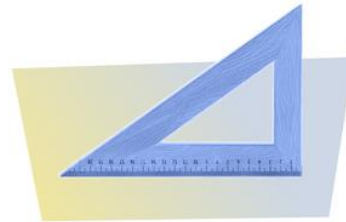

[Network](#) [Research](#) [Education](#)

## → Case studies

Learn about our international cases on climate change adaptation. Each case provides learning material and is open to comment and join. (THIS TEXT NEEDS TO BE EDITED)

- Case Study | San Salvador
- Case Study | Guttannen
- Case Study | Colombia

## → Educational tools

We provide educational tools to gain more knowledge about our cases and for our community. (THIS TEXT NEEDS TO BE EDITED)

- Adaptation, Action & Strategies
- Case Study Models
- Ethical Principle

## → External resources

We are interested in connecting knowledge, therefore we provide a list of external resources. (THIS TEXT NEEDS TO BE EDITED)

- Online courses
- Videos & Animations
- Tools

*Thank you for your interest!*
