

# Ökologisches Seminar zum Thema der Masterarbeit – Limnologie

743333 (2019W) SE 1.0

9:30 – 10:45 SR BIOLOGIE Foyer

DATUM	NAME / N	THEMA	BETREUER / INNEN
07.10.2019		Vorbesprechung	
25.11.2019	Alberto Picece	Quantification and qualification of microplastics in cryospheric habitats and ecological implication <i>MA-Concept</i>	B. Sattler
02.12.2019	Hanna Schwehr	Strategien zur erfolgreichen Wiederansiedlung von Steinkrebsen <i>MA-Concept</i>	L. Füreder
	Daniela Frantal	Integrative taxonomy: Morphology and Molecular Phylogeny of the Genus <i>Urotricha</i> (Prostomatida, Ciliophora) <i>MA-Concept</i>	B. Sonntag
	Mario Aigner	Fischfraßdruck auf Ciliaten, Bestimmung mittels Mikroskop und FISH <i>MA-Concept</i>	B. Sonntag J. Wanzenböck
09.12.2019	Nikolai Rastl	Zooplankton colonization of man-made mountain Reservoirs in the Tyrolean Alps <i>MA-Report</i>	B. Tartarotti
	Fabian Sommer	Man-made mountain reservoirs- Ciliates in human-influenced habitats <i>MA-Report</i>	B. Tartarotti B. Sonntag
13.01.2019	Anna Schöpfer	Responses of aquatic and semi-aquatic organisms to river restoration at the Tyrolean Lech <i>PhD-Concept</i>	L. Füreder
	Sara Nicoletti	Ecological impact of the usage of SNOMAX as ice nucleator in cryospheric habitats <i>MA-Concept</i>	B. Sattler
20.01.2019	Ines Hrabie	Functional role and importance of symbiotic organisms: the example of epibiont annelids and their crayfish hosts <i>PhD-Concept</i>	L. Füreder
