

# Ökologisches Seminar - Limnologie 743333

Seminars in Freshwater Ecology

**WS 2021/2022**

Montag, 11:00-12:00, online

| Date                      | Name                           | Title   |
|---------------------------|--------------------------------|---|
| 22 <sup>nd</sup> November | Sebastian Pohl<br>Max Kortmann | Microplastic Pollution in Arctic Cryospheric Habitats: Ecological Implications for Microbial Communities and Distribution Vectors |
| 06 <sup>th</sup> December | Matteo Roncoroni               | Biofilms and the dynamics of proglacial margins   |
| 13 <sup>th</sup> December | Valentin Schwartz              | Oxygen-dependent migration behaviour of zooplankton and physiological adaptations to hypoxic/anoxic conditions in Lake Piburg     |
| 10 <sup>th</sup> January  | Dunja Lukić                    | title pending   |
| 17 <sup>th</sup> January  | Lina Reding                    | Fluxes and Fate of Microplastics in Northern European Waters  |
| 24 <sup>th</sup> January  | Rebecca Oester                 | Land use affects shredder community and fragmentation rates in headwater streams  |
| 31 <sup>st</sup> January  | Thea Schwingshackl             | Tiny but mighty mayfly - probing <i>Prosopistoma pennigerum</i> as the flagship for a future Vjosa national park                  |
