

Ökologisches Kolloquium

Sommersemester 2022

März

14

Prof. Andrew V. Suarez, PhD

(University of Illinois Urbana-Champaign, School of Integrative Biology)

Ecological insights from comparing native and introduced population of invasive ants

17:00 eLecture - online

März

28

Prof. Ryan D. Stewart, PhD

(Fulbright Visiting Professor at the University of Innsbruck; Virginia Tec)

Sustainable soil management across systems and scales: implications for water and carbon cycling

17:00 eLecture - online

Mai

09

em. Univ.-Prof. Dr. Kurt Kotrschal

(Universität Wien, Fakultät für Lebenswissenschaften)

Zur Situation der Wölfe in Europa und Österreich

17:00 HS B, Technikerstr. 25

Mai

23

Timothy Griffis, Professor of Biometeorology

(University of Minnesota, St. Paul)

Constraining regional N₂O and NH₃ emissions using tall tower

17:00 eLecture - online

Juni

13

Andrea Franzetti, Assoc. Professor of Microbiology

(Università degli Studi di Milano-Bicocca)

„Title will be advised“

17:00 eLecture - online

Juni

20

Dr. Isabelle Domaizon

(French National Institute for Agriculture, Food, and Environment - INRAE)

Paleoreconstructions of micro-eukaryotic diversity to serve lake ecology research : potential, recent advances, and challenges.

17:00 eLecture - online

Juni

24

Antrittsvorlesung: Univ.-Prof. Dr. Gabriel Singer

(Institut für Ökologie, Universität Innsbruck)

Time/place will be advised
