

# Ökologisches Kolloquium

Sommersemester 2022

März  
14

**Prof. Andrew V. Suarez, PhD**

(University of Illinois Urbana-Champaign, School of Integrative Biology)

Ecological insights from comparing native and introduced population of invasive ants

17:00 eLecture - online

März  
28

**Prof. Ryan D. Stewart, PhD**

(Fulbright Visiting Professor at the University of Innsbruck; Virginia Tec)

Sustainable soil management across systems and scales: implications for water and carbon cycling

17:00 eLecture - online

Mai  
09

**em. Univ.-Prof. Dr. Kurt Kotrschal**

(Universität Wien, Fakultät für Lebenswissenschaften)

Zur Situation der Wölfe in Europa und Österreich

17:00 HS B, Technikerstr. 25

Mai  
23

**Timothy Griffis, Professor of Biometeorology**

(University of Minnesota, St. Paul)

Constraining regional N<sub>2</sub>O and NH<sub>3</sub> emissions using tall tower observations and chemical transport modeling

17:00 eLecture - online

Juni  
13

**Andrea Franzetti, Assoc. Professor of Microbiology**

(Università degli Studi di Milano-Bicocca)

Supraglacial microbial habitats: Ecological features and anthropogenic impact

17:00 HSB 1, Technikerstr. 13b

Juni  
20

**Dr. Isabelle Domaizon**

(Ecosystems and Food Security Institute for Agriculture, Food, and Environment - INRAE)

Constructions of micro-eukaryotic diversity to serve lake ecology research : potential, recent advances, and challenges.

17:00 eLecture - online

Juni  
24

**Antrittsvorlesung: Univ.-Prof. Dr. Gabriel Singer**

(Institut für Ökologie, Universität Innsbruck)

Time/place will be advised
