

Aufbaukurs “Topics in Microeconomics“

5St. WS 07

General Remarks

The course „Topics in Microeconomics“ will be taught in English. It consists of a weekly 3-hour lecture (LV-Nr.: 432124, lecturers: Anita Gantner and Francesco Feri) as well as a 2-hour proseminar (LV-Nr.: 432125, lecturer: Alexander Konovalov).

Why do we need to study microeconomic theory? The simple answer is a better understanding of economic activity, which helps an agent in an economic system to better understand the way markets work. This, in turn, allows him to achieve better outcomes for himself.

The 3-hour lecture will start by covering basic consumer theory. We will study how market demand is derived from the utility maximizing behaviour of individual consumers and how it changes with prices and income. We will investigate how choices of agents are affected by conditions of uncertainty and decisions that have to be taken over time.

In general equilibrium model, multiple agents trade the goods among themselves in attempt to make themselves better off. We will answer the questions of what is the outcome of such a process and whether such an outcome is desirable. Finally, we touch the subject of information economics and study situations of information asymmetry, that is, situations where some economic agents possess some knowledge that others do not.

The 2-hour proseminar will approach the questions above from the side of the producer. We will study the technology of a firm and see how this constrains a firm's goal of profit maximization. We will study optimization and comparative statics in order to predict outcomes and the effect of changes to these outcomes at the optimum. We will see why profit maximization and cost minimization as two possible approaches to represents a firm's goal are just two sides of the same coin.

While we focus on private goods in the first part, the provision of public goods will be a topic for the second part of the seminar. Private goods are usually purchased and consumed by individuals, and the purchaser can exclude others from consuming his good. This is not the case for public goods. For example, clean air is a public good since nobody can be excluded from breathing it, even if he has not contributed anything to keeping the air clean. The challenging question here is how to ensure that people contribute the efficient amount for a public good. We study a price system that supports an efficient allocation of the public good as well as some other mechanisms that reveal the true value of each agent for the public good.

Requirements

Basic knowledge of microeconomics as well as the willingness to deal with formal models.

Target group

Students of the upper division.

Course credits within the curriculum

Within the curriculum of the majors VWL, BWL, IWW and WIPÄD this course will be credited as follows (the required number of courses, resp. hours according to the curriculum of each major is added in parenthesis):

Studienrichtung	Anrechenbarkeit im Studienplan
VWL	<ul style="list-style-type: none">- als Aufbaukurs VWL, Wirtschaftstheorie gem. § 7 Abs. 2 (a) (1 Kurs)- als wirtschaftswissenschaftlicher Kurs gem. § 7 Abs. 3 (a) (ein Wahlkurs)- als Freies Wahlfach gem. § 8 (insgesamt 15 Stunden)
BWL	<ul style="list-style-type: none">- als volkswirtschaftlicher Kurs gem. § 7 Abs. 2 (d) (2 Kurse)- als Wirtschaftswissenschaftlicher Kurs gem. § 7 Abs. 3 (a) (ein Wahlkurs)- als Freies Wahlfach gem. § 8 (insgesamt 15 Stunden)
IWW	<ul style="list-style-type: none">- als volkswirtschaftlicher Kurs gem. § 7 Abs. 2 (f) (2 Kurse)- als Wirtschaftswissenschaftlicher Kurs gem. § 7 Abs. 3 (a) (ein Wahlkurs)- als Freies Wahlfach gem. § 8 (insgesamt 15 Stunden)
WIPäd	<ul style="list-style-type: none">- als volkswirtschaftlicher Kurs gem. § 7 Abs. 2 (d) (1 Kurs)- als Freies Wahlfach gem. § 8 (insgesamt 15 Stunden)

Time and Place

The 3-hour lecture will take place weekly on Wednesdays from 11:00-11:45 in SR 9, (lecturer: Francesco Feri) and on Thursdays from 14:15-15:45 in SR 19, (lecturer: Anita Gantner). The corresponding 2-hour proseminar will take place weekly on Wednesdays from 14:15-15:45 in SR 9 (lecturer: Alexander Kononov).

All necessary information for this class will be given during the first class on Wednesday, October 3, 11:00 in SR 9.

Outline of Contents

Alexander Konovalov's part:

1. Consumer Theory

Consumer preferences, utility maximization
Comparative statics, the Slutsky equation
Budget constraints, aggregate demand

2. Equilibrium Analysis

Walrasian equilibrium, Pareto optimality
Existence of Walrasian equilibrium
The first and the second welfare theorems
Stability of equilibrium

3. Uncertainty and Time

Lotteries, expected utility and risk aversion
Intertemporal preferences and general equilibrium over time
Asset markets

4. Information

The principal-agent problem, hidden action
Moral hazard, hidden information
Adverse selection, signalling

Anita Gantner's part:

1. Producer Theory

Technology of a firm, production functions, returns to scale
Profit maximization, factor demand function, profit function
Cost minimization, conditional factor demand functions, cost function

2. Public Goods

Simple Economy with public goods and private goods
Private provision of a public good
Lindahl equilibrium
Demand revealing mechanisms
Voting mechanism
Experiments on public goods

3. Externalities

An example of a production externality
Solutions to the externality problem: Pigovian taxes, Property rights
Efficiency conditions with externalities

Francesco Feri's part:

1. Competitive Markets

Industry supply function, market equilibrium
Efficiency and welfare

2. Monopoly

Welfare and output
Price discrimination

3. Oligopoly

Cournot and Bertrand equilibrium
Quantity and price leadership
Collusion

The main textbook will be

Varian, H., *Microeconomic Analysis*, 3rd ed., Norton & Co. 1992

Grading Scheme for this course:

The course will be completed with a written “Fachprüfung”, which includes material from both parts of the course. The overall grade is the grade of the written “Fachprüfung”. Exam date is January 24, 2008.

In order to present yourself to the “Fachprüfung”, each part (lecture and proseminar) has to be passed with a positive result. Your performance in each part of this course includes regular homework assignments as well as three exams. The exam dates will be October 31, 14:00-15:45 in U3; December 13, 14:00-15:45 in HS 2 and January 24, 14:00-15:45 in HS 2.
