Curriculum for the **Bachelor's Programme European Ethnology** at the Faculty of Humanities 1 of the University of Innsbruck

§ 1 Profile

- (1) The Bachelor's Programme European Ethnology is grouped among the Humanities and Cultural Sciences.
- (2) **The qualification profile** of the Bachelor's Programme European Ethnology aims at conveying scientifically well-founded analysis, interpretation and reflection skills, which enable students to examine cultural phenomena and popular identity models as well as their contextualization with regards to discourse-analysis and practice-theory.

Students learn about European Ethnology in its folkloristic, ethnological and cultural- anthropological subject tradition, and they get an overview of its specific question, interest, source and method profile, which distinguishes it from other cultural scientific disciplines. This also includes the interconnection of historical and current issues as a special characteristic of European Ethnology.

Students thus acquire abstraction abilities and learn to think in a multidisciplinary way.

In this context, they develop awareness of the questions of social constructions such as historicity, modernisation, identity politics, globalisation, gender etc., and they learn to relativise their own point of view. With its comparative and cultural-relativistic perspective, the Bachelor's Programme European Ethnology also promotes constructivist thinking and enables students to critically reflect on their own assumptions and categories of perception.

Key learning outcomes: The objective of the Bachelor's Programme European Ethnology is to prepare graduates for a wide range of cultural and social-scientific occupational and vocational fields. By the end of the study programme, students develop critical reflection skills which enable them to apply European-ethnological knowledge to cultural problems by formulating and substantiating scientific arguments. Graduates are able to collect and interpret relevant data by using subject-specific methods and to support with this scientific positions with their social and ethical issues, to questions them and to convey this outcomes to experts and well as laypersons.

Key qualifications and soft skills: In examining European-ethnological issues, graduates establish and expand verbal and written skills by communicating and presenting research results, skills of information management and self-management as well as social skills and teamwork.

- (3) The Bachelor's Programme European Ethnology prepares graduates for a wide range of occupational fields, such as in documentation, collections, museums and exhibitions, libraries and publishing, public relations, cultural journalism, adult education, developmental work, cultural policy and administration, tourism as well as intercultural social work and cultural management.
- (4) The Bachelor's Programme European Ethnology is characterised by a special **research orientation**. Students are carefully introduced to specific research processes as well as issues of interdisciplinarity based on examples of cultural contact and cultural transfer.

§ 2 Scope and duration

The Bachelor's Programme European Ethnology covers 180 ECTS-Credits, with a duration of six semesters.

§ 3 Types of courses and maximum number of participants

 1. **Lectures** (VO) are courses held in lecture format. They introduce the research areas, methods and schools of thought for a given subject. No maximum number of participants
