

The English version of the curriculum for the „Doctor of Philosophy programme Computer Sciences“ is not legally binding and is for informational purposes only. The legal basis is regulated in the curriculum published in the University of Innsbruck Bulletin on 20 March 2009, issue 46, No. 204.

Decision of the Curriculum Committee of the Faculty of Mathematics, Computer Science and Physics on 22 January 2009, approved by Senate Decree on 5 March 2009:

On the basis of § 25 para. 1 no. 10 University Organisation Act 2002, BGBl. I (Federal Law Gazette) No. 120, most recently amended by Federal Law BGBl. I (Federal Law Gazette) No. 134/2008 and § 32 Section "Regulations of Study Law", republished in the University of Innsbruck Bulletin of 3 February 2006, Issue 16, No. 90, most recently amended by the University of Innsbruck Bulletin of 7 May 2008, Issue 42, No. 272, the following is decreed:

**Curriculum for the
Doctor of Philosophy programme Computer Sciences
at the Faculty of Mathematics, Computer Science and Physics
of the University of Innsbruck**

§ 1 Qualification profile and programme objectives

- (1) The Doctor of Philosophy programme Computer Sciences belongs to the group of studies in the Engineering Sciences.
- (2) Graduates of the Doctor of Philosophy programme Computer Sciences have a systematic understanding of their research discipline and research methods of this field.
- (3) Graduates of the Doctor of Philosophy programme Computer Sciences are capable of conducting independent research in a special area of Computer Science or the didactics of Computer Science. They are prepared for research activities in industry, business, and public service and for research and teaching at universities and other post-secondary educational and research institutions.
- (4) Through their submission of an original piece of scientific work, graduates of this program have made their own contribution to research which widens boundaries of knowledge and is conform to the evaluation standards of international experts. They identify scientific questions and independently subject them to critical analysis.
- (5) Graduates are capable of independently designing and carrying out significant research projects with scientific integrity and are also qualified to reflect on these processes in terms of the theory philosophy of science.
- (6) Graduates are particularly able to reflect on questions critically, to participate in objective discourse, and to work creatively.
- (7) Graduates of the Doctor of Philosophy programme Computer Sciences are capable of transcending the boundaries of their special field and integrating themselves constructively in interdisciplinary discourse.

§ 2 Length and scope

The Doctor of Philosophy programme Computer Sciences takes three years (six semesters), which equals 180 ECTS credits.

§ 3 Admission

- (1) Valid proof of the necessary academic level for admission to the Doctor of Philosophy programme Computer Sciences must be provided. This includes proof of completion of relevant diploma or master programmes, of completion of relevant diploma or master programmes at a university of applied science or completion of other equivalent studies at an accredited Austrian or non-Austrian post-secondary educational institution. If equivalency is given in principle, and only a few elements are missing for full equivalency, the rector's office is entitled to combine the determination of equivalency with the obligation to pass certain examinations in the course of the Doctor of Philosophy programme Computer Sciences.
- (2) Relevant studies are in any case
 1. the Magister Programme Computer Science at the University of Innsbruck,
 2. the Master Programme Computer Science at the University of Innsbruck,
 3. the Master Programme Business Informatics at the University of Innsbruck,
 4. the Academic Teacher Training Programme with Diploma Thesis for the School Subjects Computer Sciences and Information Management at the University of Innsbruck.

§ 4 Types of courses and maximum number of students per course

- (1) **Lecture (VO):** In a didactically well-designed manner, lectures provide an introduction to central concepts, results, and methods of the special area in question.
- (2) **Seminar (SE):** Seminars are courses with continuous performance assessment which scientifically reflect on the content and methods of a subject area by means of presentations and discussions.
Maximum number of students: 30
- (3) **Special courses (KU)** are courses with continuous performance assessment that are especially offered for the doctoral programme. They are adapted to the content and learning objective in question, always include intensive scientific discussions, and require active student participation.
Maximum number of students: 30

§ 5 Procedure for the allotment of places in courses with a limited number of participants

Students whose study time will be prolonged if they are not admitted are to be given priority.

§ 6 Modules

(1) The following modules - equal to 60 ECTS credits – are mandatory:

1	Mandatory Module: Doctoral Thesis Defense	Sem. hours	ECTS credits
	Final oral dissertation defense before an examination board	-	5
	Total	-	5
	Learning objectives of the module: Presentation, reflection on, and analysis of the dissertation results in the overall context of the doctoral programme; the focus is on summarizing and explaining results of the research project, on presenting the increase in knowledge for the discipline, on demonstrating evaluation and method competences, as well as on presenting results.		
	Admission requirements: positive completion of all other modules and positive evaluation of the dissertation		

2	Mandatory Module: Analysis of Own and External Research Results	Sem. hours	ECTS credits
a.	SE Seminar 1	2	5
b.	SE Seminar 2	2	5
	Total	4	10
	Learning objectives of the module: After the completion of this module, students are familiar with the relevant literature in their special field. They are able to present topics from their dissertation area both visually and orally.		
	Admission requirements: none		

3	Mandatory Module: Core Subject	Sem. hours	ECTS credits
	SE Seminar 3	2	5
	KU Course 1	1	2.5
	KU Course 2	1	2.5
	Total	4	10
	Learning objectives of the module: Having successfully completed this module, students are able to discuss the current state of knowledge in the area of the dissertation and can critically reflect on and discuss issues with experts of the chosen sub discipline. On this basis, they are able to make their own contributions to research.		
	Admission requirements: none		

4	Mandatory module: Participation in Scientific Discourse	Sem. hours	ECTS credits
	Active participation in national and international scientific discourse at conferences and in the form of projects; participation in summer/winter schools.		10
	Total		10
	Learning objectives of the module: Becoming familiar with current research findings, presenting research results in national and international forums, acquiring basic skills in research management and in applying for research funds; students analyze and critically assess their own research results and those of others; creation of a culture that is committed to research ethics and rejects plagiarism.		
	Admission requirements: none		

5	Mandatory module: Interdisciplinary Seminar in the PhD Program	Sem. hours	ECTS credits
	SE Seminar in Mathematics, Computer Science and Physics	2	2.5
	Total	2	2.5
	Learning objectives of the module: Students are able to actively reflect on the current state of knowledge in the area of the dissertation and related science disciplines. They possess didactic skills which enable them to clearly present their research results to laypersons and experts alike and explain complicated correlations in a clearly understandable manner.		
	Admission requirements: none		

6	Mandatory Module: Scientific Basics/Core Skills of the Thesis Topic	Sem. hours	ECTS credits
	Courses, as defined in the dissertation agreement, equal to 15 ECTS credits, must be completed to develop the scientific basis/core competences for the dissertation topic.	-	15
	Total	-	15
	Learning objectives of the module: After the successful completion of this module, students possess the high level of subject-specific knowledge necessary for working on the dissertation.		
	Admission requirements: none		

7	Mandatory Module: Generic Skills	Sem. hours	ECTS credits
	Courses, as defined in the dissertation agreement, equal to 7.5 ECTS credits, have to be completed. One course must be chosen from the field of "Equality and Gender". Additionally, courses are offered which develop didactic skills and competences for subsequent knowledge transfer. Suitable options are marked in the course catalog.	-	7.5
	Total	-	7.5
	Learning objectives of the module: After the successful completion of this module, students have advanced theoretical and practical knowledge and skills in selected disciplines which transcend their subject-specific competencies put them in a position to pursue independent scientific work, and help them succeed in their future careers.		
	Admission requirements: none		

§ 7 Dissertation

- (1) In the course of the doctoral programme a dissertation has to be written, which equals 120 ECTS credits. The dissertation is a scientific piece of work which – in contrast to a diploma or master thesis – serves to prove the student's ability to cope with scientific questions in an independent way. The dissertation topic has to be chosen from the field of computer science or didactics of computer science.
- (2) The student has to propose a team of supervisors consisting of at least two people (dissertation committee) and to nominate one of them as the supervisor mainly responsible. It is permissible to propose supervisors (with the exception of the main supervisor) from related fields. If the dissertation belongs to the didactics of computer science, the dissertation committee must include representatives of both the subject area and the field of subject-specific didactics. In justifiable exceptional cases it is possible for students to propose only one supervisor.
- (3) Prior to beginning the work, the student has to communicate the dissertation topic and the names of the supervisors in writing to the Director of Studies. If work on the dissertation requires monetary or non-monetary resources from university institutions, the allocation of these resources is possible only if the head of the institution has been informed of the planned allocation and has not vetoed it within one month for reasons of significant negative influences on teaching and research. Topic and supervisors are considered as accepted, if the Director of Studies does not veto them by means of a decree within one month after the receipt of the proposal.

§ 8 Examination regulations

- (1) The evaluation of Modules 2, 3, 5, 6, and 7 is based on course examinations.
 1. Lectures are evaluated by means of a single exam at the end of the course. The lecturer is required to communicate methods and evaluation criteria (oral and/or written) before the course starts.

2. The evaluation of courses with continuous performance assessment is based on the student's regular, written and/or oral contributions. The lecturer is required to communicate evaluation methods and criteria before the course starts.

(2) Mandatory Module 4 is evaluated by the main supervisor on the basis of a performance report written by the student. A positive grade has to read "participated with success"; a negative grade has to read "participated without success".

(3) The evaluation of Mandatory Module 1 - "Doctoral Thesis Defense" - is based on an oral exam taken before an examination board consisting of three examiners.

§ 9 Academic degree

Graduates of the Doctor of Philosophy programme Computer Sciences are awarded the academic degree of "Doctor of Philosophy" or "PhD", in brief.

§ 10 Implementation

This curriculum comes into force on 1 October 2009.

For the Curriculum Committee:
Univ.-Prof. Mag. Dr. Alexander Ostermann

For the Senate:
Univ.-Prof. Dr. Ivo Hajnal
