ISBN 9780367207168

Corpus-Based Analysis of Ideological Bias presents research combining a range of corpus-linguistic techniques which are employed to analyse how migration discourse is (re)constructed in the contemporary British press. Two specialised corpora containing 1,000 news reports, editorials, and opinion pieces from five major national British newspapers were collected and annotated for this research. The event separating these two corpora is the 2016 referendum on Britain's membership of the European Union (EU). This book is a useful source not only for students of English, linguistics, and media studies, but also for researchers in the fields of applied corpus linguistics, critical discourse studies, contemporary media analysis, and metaphor research.
