The positive effects of education for free

Recently The European Youth Forum ~~has announced~~ ~~has~~ ~~discussed~~ about the entrance fees at universities, whether ~~it is~~ ^{it} is positive or negative to have free education. The current situation in Austria ~~for years~~ is, that everyone who wants to, is able to study without any costs.

For Austrian's the situation is clear. Studying is available for the whole society. There are not any costs, except the twelve euros for the OH. Young people can go directly to university after school and if they get enough support from their parents, it is ~~so~~ simple to study without working in their free-time. In Austria ~~there~~ there is the opportunity to work for three years after ^{the} Matura and attend university later with a monthly support from the state. The current situation gives every person in Austria the possibility to study.

There ~~are~~ ~~is~~ are a variety of pros and cons, when it comes to free university education.

One negative aspect is, for instance that those, who are not completely interested in a study, take away ~~some~~ places from students, who really want to do this. Furthermore, ~~and~~ if there are no costs some people do not make much effort for the courses they attend, because it is free to do it a second time. ~~Appositive~~ Although there are some positive sides ~~is~~ going with free education. For example pupils, who cannot afford ^{it} are able to study. If the student is from a less wealthy family, he or she is able to work and get enough money for living. Studying without costs is always in connection with the risk, that less interested pupils ~~is~~ participate in ~~at~~ courses, only for the reason that they have something to do.

Education for free would clearly bring a wide ^{range} of positive effects. A ^{diversity of} ~~lot~~ pupils ^{could} attend university from poor families.

year

As well as the ~~opportunity~~ chance to ~~participate~~ ~~in~~ get ~~the~~ ~~same~~ education in other countries. ~~A year~~ ~~year~~, A ~~year~~ abroad would be available for the whole society in the EU. A pro going with the latter is, that ~~up~~ students gain experience, if they study a amount of ~~for~~ ~~some~~ time abroad. There are more positive effects in connection with free university places, than negative. Pupils with talent can do more studies and have the possibility to get education

over a long time.

To sum up it would be worth a try to give the students in the EU the chance to study without costs and an excellent opportunity to support poor families.

~~only for the reason that they have something to do~~

~~and~~

~~for~~
