Join the world of power for an internship (m/ f) in Civil Construction EPC Business

on our Köln Niehl Gas Power Plant construction site!

We are looking for you to join our global Plant Business Civil team for an internship with the goal to support our Civil Construction Team. This special internship on offer will be on the Köln Niehl construction site.

Supporting our Civil Engineers and Civil Managers in their daily activities in the demanding world of a big construction site with challenging civil works on various areas of the civil business (piling, diaphragm walls, massive concrete foundations; structural steel, etc.) you will get a broad overview of all civil activities. Starting with review of drawings, quality checks on site, progress monitoring and documentation you will get handed over responsible tasks according to the knowledge you gained during your studies.

As the ideal candidate for the internship:

- You are studying in civil engineering to achieve a bachelor's or a master's degree
- You are good in English (language on site is English/German)
- You are a pragmatic thinking personality,
- You enjoy responsibility,
- You have the drive and energy to succeed in the demanding, exciting world of the construction/contracting industry; and
- You want to work in a multicultural environment somewhere

The preferred minimum length of the internship is six months and should start as soon as possible. Proposal would be to start in Feb. 2014 until August 2014, or to start in Sept 2014 until Feb 2015 or one year with the starting date Feb.2014

For further information on possible contents of the internship please don't hesitate to contact **Axel Wais** (e-mail: Axel.Wais@power.alstom.com).

You can send your application (in English or German) to ALSTOM (Switzerland) Ltd.
