

Internship and master thesis opportunity

Title:

“Establishment of a questionnaire for high altitude psychosis”

Who can apply: students of medicine

What we offer: the opportunity to write a master thesis in High altitude medicine & physiology. The student will be in charge of establishing an appropriate questionnaire to detect psychotic episodes in high altitude climbers.

When: the student will work in collaboration with a medical doctor of Innsbruck (specialized in psychiatry) and the head of the EURAC institute of mountain emergency medicine from December 2017 to March/April 2018

Where: ideally the student lives in North or South Tyrol, but also candidates coming from other regions/countries will be considered

How: the student could work from home and only occasionally go to Innsbruck or Bozen for project meetings

Requisites: knowledge of German and/or English

All travel expenses for project meetings will be reimbursed.

If you are interested, please submit your application (CV and short motivational letter) at:

mountain.emergency@eurac.edu

Deadline 30 November 2017

Looking forward to hear from you!
