### Property from a Comparative Perspective The transfer of goods from a European comparative perspective

Wednesday, January 9<sup>th</sup>, 09.00 a.m.

Hörsaal 3108

#### Abstract

The requirements that have to be met in order to transfer property of goods are regarded as the backbone of patrimonial private law. Whereas in some legal systems the delivery of goods is required, in others the underlying contract itself transfers the title. Moreover, while the causal systems require a valid contract or obligation, in other legal systems the principle of abstraction prevails. The aim of the presentation is to analyze these main systems for the transfer of goods from a European comparative perspective, in order to highlight their advantages and disadvantages.

*Professor Murga Fernández will also present his course on Comparative Property Law which he will teach during his stay in Innsbruck in January.*
