**Course description:**

Method-centrism is a typical feature of the modern knowledge production that has been questioned time and again from different critical perspectives. Feminist problematizing of ratiocentric, heteropatriarchal, Euromodern methodologies intertwines in its complex inquiry a number of issues that testify to the failure of the current dominant epistemic machine, melting the boundaries between scientific and artistic, empirical and theoretical, rational and emotional knowledge, as well as textual and visual, oral and written forms of research. The course delves into these cutting-edge advances in feminist rethinking of methodologies and focuses on the most promising ways out of the methodological conundrum.
