Greedy Approximation by Arbitrary Sets

Greedy approximation with respect to dictionaries is contemporary well-developed method of nonlinear approximation. We define greedy approximation algorithm with respect to arbitrary set instead of dictionary, investigate its convergence and arrive at fine problems in geometry of Banach spaces.

Zeit: **Montag, den 20. Mai 2019 um 16.00 Uhr**

Ort: **Bauing.-Gebäude, Technikerstraße 13, HSB 9**

Gäste sind herzlich willkommen!
