

**06.03.2024**

**Univ.-Prof. Dipl.-Biol. Dr. Stefan Dötterl,**  
**Department of Environment and Biodiversity, Paris Lodron University of Salzburg**  
Flower scent as pollinator attractant: basic, applied and climate change research

**20.03.2024**

**Dr. Walter Durka,**  
**Department Community Ecology, Helmholtz Center for Environment Research**  
RegioDiv-Genetic diversity patterns of *herbaceous* plants in Germany and practical implication for seed zone management

**10.04.2024**

**Martina Tomasella, Ph.D, Department of Life Sciences, University Trieste**  
The Roles of non-structural carbohydrates in the hydraulic regulation of plants under drought

**24.04.2024**

**Prof. Dr. Marcel Bucher, Institute of Plant Sciences Biocenter, University of Cologne**  
Phosphate transport in *mycorrhizal symbiosis*: A molecular perspective

**08.05.2024**

**Prof. Dr. Till Ischebeck, Institute for Plant Biology and Biotechnology, University of Münster**  
The multiple functions of plant lipid droplets – what we can learn from the proteins associated with them

**29.05.2024**

**Prof. Dr. Rajeev Arora, Department of Horticulture, Iowa State University**  
Thermonasty in *Rhododendron*

**05.06.2024**

**Fabio Candotto Carniel, Ph.D, Department of Life Sciences, University of Trieste**  
The lichen photobiont *Trebouxia*: what we know and don't about its life cycle

**19.06.2024**

**Dr. Hugh Pritchard, Kunming Institute of Botany**  
Banking on a future for humanity-plant conservation in the 21st century
