Introduction

This edition of the *Guide to the Archival Record Groups and Collections* held at the Central Zionist Archives has once again been expanded. It includes new acquisitions of material, which have been received recently at the CZA.

In addition, a new section has been added, the Maps and Plans Section. Some of the collections that make up this section did appear in the previous *Guide*, but did not make up a separate section. The decision to collect the various collections in one section reflects the large amount of maps and plans that have been acquired in the last two years and the advancements made in this sphere at the CZA.

Similarly, general information about two additional collections has been added in the *Guide*, the Collection of Announcements and the Collection of Badges.

Explanation of the symbols, abbreviations and the structure of the *Guide*:

Dates appearing alongside the record groups names, signify:

- with regard to institutional archives: the period in which the material that is stored in the CZA was created.
- with regard to personal archives: the birth and death dates of the person. Dates have not been given for living people.

The numbers in the right-hand margin signify the amount of material comprising the record group, in running meters of shelf space (one running meter includes six boxes of archival material). Small amounts of archival material were not measured exactly; rather the expression <0.2 has been used, to denote "less than 0.2 running meters" (0.2 meter = approximately one box).

If not noted differently, the place of all the institutions and organizations that appear in the *Guide*, is Jerusalem (with the exception of Sections 8 and 9).

- The letter "C" before the extent of a record group indicates that the material is in the form of a xerox copy the size of the original. The letter "M" instead of the extent of a record group, indicates that the material is in the form of a microfilm. When the extent of the material appears after the letter "M", this denotes that in addition to the microfilm copy, there exists original material, to the extent indicated.
- References to information that can be found in other areas of the guide, are printed in italics.
- Record groups preceded by an asterisk, (*) appear for the first time in this edition of the *Guide*.
- The sign # signifies that the inventory of the record group, or of a series within the record group, may
- be bought at the Archives. Please note that most of the inventories are in Hebrew.
