

Services of the Contact Point for Automatic Text Recognition

1 Early-stage project consultation

Needs analysis, effort estimation and recommendations on key decision points throughout the ATR process.

4 Workshops & Training courses

Introductory workshops, in-depth sessions on specific topics – e.g. on model training in Transkribus – and tool-specific training courses as required.

2 Evaluation & Quality Assessment

Carrying out test runs, spot checks, review of interim results as well as consulting on the creation of ground-truth material (scope, quality, documentation).

5 Making data available

Advice on the integration of research output into existing library services and on workflows that are as sustainable as possible for long-term availability.

3 Tool selection & docu- mentation

Guidance on ATR tools and best practices, provision of selected internal services, and links to useful external resources; Support in the selection of formats, parameters and workflow documentation.

6 OCRmyPDF

Browser-based web service for all university members to make self-scanned files searchable. Link to the OCR web service: ulb-ocr.uibk.ac.at
