

How Reaxys can support your research and teaching in chemistry and related sciences!

Join us on 29th of May at 10.00am for online Reaxys training. You will learn how to use full potential of Reaxys for your chemistry and related sciences, research and teaching. Training will be provided by Piotr Golkiewicz, Customer Success Consultant at Elsevier Life Sciences division

Reaxys is a comprehensive curated chemistry database that allows chemists to access more than 260+ million substances, 60+ million reactions, 500+ million experimental data, 42+ million patents from 105 Patent offices around the world, and manually translated by experts in the field. In addition, Reaxys reveals the pharmaceutical potential of a substance as part of a range of in silico modeling workflows with Reaxys Medicinal Chemistry, including an interactive bioactivity tables...and more!
