

# Pollen monitoring report Obergurgl

October 7<sup>th</sup> 2022

## The pollen season is over!

As most of the plants have already finished their flowering period, we hardly detect any pollen in the air of Obergurgl. These low pollen concentrations in the air are no longer reaching the irritation threshold.

This pollen report is the last one for this year. We will report again in 2023 as soon as the first plants bloom and the pollen concentration in Obergurgl increases again.

We would like to thank our readers for their interest. We would also like to thank the Ötztal Tourist Office for sponsoring us to publish the weekly pollen report for Obergurgl.

We wish you a symptom-free autumn and winter season and look forward to being able to provide information about the pollen situation in Obergurgl again next year.

### Innsbruck\* (615 m a.s.l.)

Grasses	■	Mugwort	■
Plantain	■	Ragweed	■
Dock/Sorrel	■	Birch	■

### Obergurgl\* (1940 m a.s.l.)
