

Agenda

Joint FWF-ARRS Project "Identification of cosmic ray sources amongst jetted AGN"

Tuesday, 25.05.2021

10 am - 12 pm	Introduction	Anita & Serguei
	Session 1 - Multi-messenger (UHECRs, neutrinos, photons) measurements - new developments	
	Update on recent Auger measurements	Serguei
	Discussion	All
2 - 4 pm	Session 2 - UHECR AGN candidate sources - new developments	
	N.A.	

Wednesday, 26.05.2021

10 am - 12 pm	Session 3 - AGN jet modeling - new developments	
	Towards modeling the quiet core region of Margot M87	
	JetPhysics - Non-Linear Source Modeling with Heavy Primaries	Lukas
	Discussion	All
2 - 4 pm	Session 4 - Multi-messenger propagation - new developments	
	Probing cosmic magnetic fields from gamma-ray emission of transient sources	Paolo
	An update on fitting data for FRO source simulation properties	Jon Paul
	Discussion	All
