

Symposium

Lab-Rotations SS 2020

Master 'Molecular Cell and Developmental Biology'

Monday, October 5th, 2020,
starting at 17.00 h

Lecture Hall D, Technikerstr. 25,
upper floor

17.00 – 17:30 Short Talks (in lecture hall D)

Baumgärtner Sonja ([Hobmayer](#)): Analysis of the impact of Cadherin specific antibodies on epithelial cell regeneration in the metazoan Hydra

Berger Sarah ([Zwerschke](#)): Impact of estrogen receptor inhibitors on 3T3-L1 preadipocytes treated with soy isoflavones

Brunner Melanie ([Lusser](#)): The role of the chromodomain-helicase like-DNA binding protein 1 in regulating histone H3.3 incorporation in the Drosophila brain

Dorigatti Ilaria ([Labi](#)): The role of ACSL4 in the acquired ferroptosis resistance of hematopoietic progenitors

Fambri Valentina ([Koschak](#)): Alternatively spliced voltage-gated L-type calcium channel isoforms in mouse retina

Muller Lynn ([Hüttenhofer](#)): Investigation of the effects of small non-coding RNAs on translation in E. coli.

Nikolavic Aleksandar ([Troppmair](#)): Bioconversion of Cytochrome P450 substrates into volatile organic compounds (VOCs)

Ploner Ivan ([Zwerschke](#)): Analysing the Role of Redd2 in human adipogenic stem cells

Pribanovic Kristina ([Geley](#)): The roles of human RBM26 and RBM27 proteins in nuclear RNA metabolism

Vorleuter Alexander ([Edenhofer](#)): Differential expression of SNORD116 in disease and healthy patients cell culture models

17.30 – 18.30 Poster Presentations (in front of lecture hall D)

All students of the Master Program Molecular Cell and Developmental Biology are welcome!
