

Symposium

Lab-Rotations WS 2015/16

Master ,Molecular Cell- and Developmental Biology‘

**Thursday, May 12, 2016,
starting at 4 pm at the Technik Campus
Lecture Hall D**

16.00 – 17.15 Session 1

Bianca Salzgeber (Hobi): *Role of different dynamin 2 mutants in alveolar type II secretory lysosomes*

Katharina Klee (Huber): *Selective Transport of Apical Cargo*

Theresa Schöpp (Teis) *Characterization of Starvation Induced Endocytosis in *Saccharomyces cerevisiae**

Katharina Muigg (Jansen-Dürr): *The effect of myokines on mitochondrial potential*

Kathi Piironen (Koziel) *Role of NADPH oxidase in cellular senescence of methionine restriction*

Break

17.30 – 18.45 Session 2

Simon Messner (Egg): *Characterization of the Non-Cancerous Zebrafish Cell Line Z3 based on Metabolites and Study of the Circadian Rhythmicity of Genes in the Range of Mitochondrial Dynamics*

Julia Obergasteiger (Hobmayer): *Expression dynamics of b-catenin in head and foot regeneration in *Hydra**

Katharina Klee (Aanstad): *Molecular Characterization of the S421 allele of CXC4A*

Fabian Martin (Meyer): *Elucidating the „LIM-Code“ in pancreatic endocrine cells*

18.45 - ? Come together
