

Einführungsmodul zum Masterstudium ,Molekulare Zell- und Entwicklungsbiologie‘

01.10.19- 19.11.19: WS104325 Ausgewählte Themen der Zellbiologie (VO3)

26.11.19- 16.01.20: WS104326 Ausgewählte Themen der Entwicklungsbiologie (VO2)

jeweils Dienstag, Mittwoch, Donnerstag, 17.30-19.00 Uhr

Orte: 2.10.- 24.10.2019: **Biozentrum**, Hörsaal M.01.490 CCB, 1. Stock Innrain 80-82
ab 29. 10. 2019: **Technik** Hörsaal D, EG Technikerstr 25

WS104325 Ausgewählte Themen der Zellbiologie (VO3)

Di: 01.10.19	Dirk Meyer	4 pm „Vorbereitung MolZEB“ 5 pm Symposium Lab Rotations: Poster session and talks
Mi 2.10.19	Stephan Geley	<i>Regulation of Cell Division</i>
Do 03.10.19	Ludger Hengst	<i>Regulation of Cell Proliferation</i>
Di 8.10.19	Lukas Huber	<i>Vesicular Transport in Mammal Cells</i>
Mi 9.10.19	David Teis	<i>Endocytic Machineries in Control of Cell Signalling and Development</i>
Do 10.10.19	Oliver Schmidt	<i>Proteolysis - Pathways and Mechanisms</i>
Di 15.10.19	Alexander Hüttenhofer	<i>New Mechanisms of Gene Regulation: non-coding RNAs</i>
Mi 16.10.19	Zlatko Trajanoski	<i>Computing and probing cancer immunity n.n.</i>
Do 17.10.19	Mathias Erlacher	n.n.
Di 22.10.19	Ilja Vietor	<i>Transgenic Mice for the Identification of Novel Genes Functions</i>
Mi 23.10.19	Jakob Troppmair	<i>Cytoplasmic Signaling Pathways in the Control of Mitochondrial Function</i>
Do 24.10.19	Alexandra Lusser	<i>Epigenetic and epitranscriptomic mechanisms in flies and mice</i>
Di 29.10.19	Patrick Fischer	<i>Epigenetic Regulation of Gene Expression in Early Embryonic Development</i>
Mi 30.10.19	Frank Edenhofer	<i>Stem cells in Biology and Regenerative Medicine</i>
Do 31.10.19	Ahmad Salti	<i>From Stem Cells to Neurons: Applications Exemplified by Parkinson's Disease</i>
Di 5.11.19	Jerome Mertens	<i>Human Cellular Models to Study Aging & Disease</i>
Mi 6.11.19	Adi Sandbichler	<i>Homeostasis and Environmental Adaptation in Fish Cells</i>
Do: 7.11.19	Martina Höckner	<i>Molecular Stress Response in Invertebrates</i>
Di: 12.11.19	n.n.	
Mi 13.11.19	Werner Zwerschke	<i>Molecular Biology of Adipose-derived Stem Cells and Adipocytes</i>
Do 14.11.19	Pidder Jansen-Dürr	<i>Molecular Mechanisms of Cellular Senescence and Ageing</i>

Di 19.11.17 Klausur 1. Klausur (nur Zellbiologie)

WS104326 Ausgewählte Themen der Entwicklungsbiologie (VO2)

Di 26.11.19	Bert Hobmayer	<i>Wnt Signalling in the Axial Development und Morphogenesis of Cnidarians</i>
Mi 27.11.19	Peter Ladurner	<i>Flatworms: Modell Organisms for Stem Cells, Regeneration und Evolution</i>
Do 28.11.19	Bernhard Egger	<i>Regeneration and Molecular Phylogeny of Flatworms</i>
Di 03.12.19	Ute Rothbächer	<i>Molecular Programming of Early Chordate Development</i>
Mi 04.12.19	Emmanuel Derudder	<i>Gene targeting in mice to study humoral immunity</i>
Do 05.12.19	Dirk Meyer	<i>Zebrafish as a Model in Development and Medicine</i>
Di 10.12.19	Robin Kimmel	<i>Formation and Regeneration of the Pancreas</i>
Mi 11.12.19	Thorsten Schwerte	<i>Cardiovascular Physiology: Research/Methods in the Model Animal Zebrafish</i>
Do 12.12.19	Margit Egg	<i>Interaction of the O2 Signaling Pathway with the Circadian Rhythm</i>
Mi 08.01.20	Pia Aanstad	<i>Hedgehog signalling</i>
Do 09.01.20	Georg Dechant	<i>The Molecular Biology of Learning and Memory</i>
Di 14.01.20	Birgit Weinberger	<i>Aging of the Immune System and Vaccination in Old Age</i>
Mi 15.01.20	Andreas Villunger	<i>Lymphocyte Development and Cell Death</i>
Do 16.01.20	n.n.	
Di 28.01.20	Klausur	1. Klausur (nur Entwicklungsbiologie)
Mo 02.03.20	n.n.	Symposium on Lab Rotations
Fr: 28.02.20	2. Klausur	Zellbiologie + Entwicklungsbiologie
Fr: 17.04.20	3. Klausur	Zellbiologie + Entwicklungsbiologie
