

3rd Call for Papers

The Annual Meeting of the Austrian Economic Association (NOeG) will be held at the University of Innsbruck Faculty of Economics and Statistics

May 10th-11th, 2013

Main conference topic is
EUROPEAN INTEGRATION: QUO VADIS?

In recent decades, the European integration has made major steps forward. Yet, since the financial crises 2008/2009 severe disequilibria have become manifest questioning the sustainability and the further development of the European integration. Specifically, within the European Monetary Union these disequilibria are reflected by large trade deficits, capital outflows, fiscal deficits and the accumulation of large debt in some of its member states. Taking a long-run view, the major topic of the conference will revolve around the perspectives of the common currency and the economic mechanisms and policies required promoting sustainable growth and further integration in Europe. Beside this main topic, contributions from all other fields of economics are welcome.
