

Studies on Total Synthesis of the Cytotoxic Marine Alkaloid Agelastatin A
 Anderson, G. T.; Chase, C. E.; Koh, Y.-H.; Stien, D.; Weinreb, S. M.
J. Org. Chem. 1998, 63, 7594

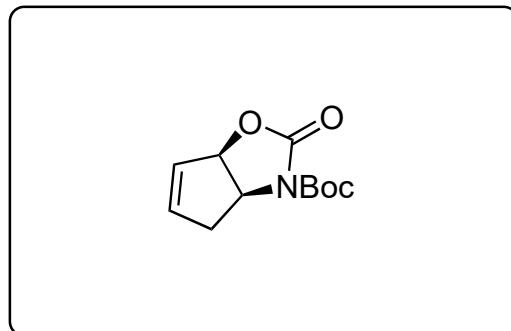

How would you make A?
 O-Methylcarbamate + SOCl₂

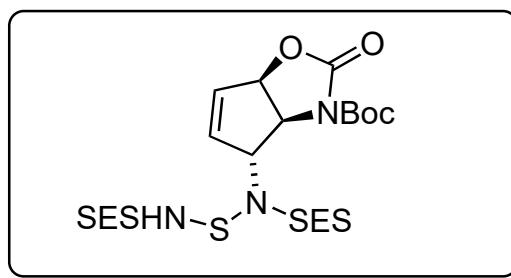

What is the name of this reaction? Mislow-Evans

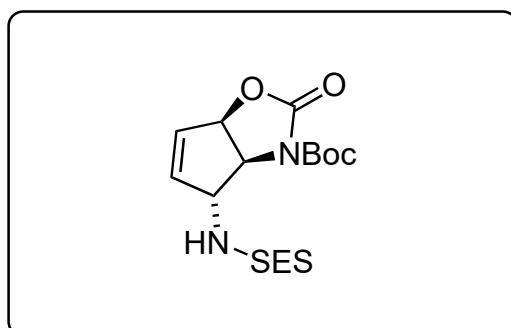

Please draw a mechanism and the frontier molecular orbitals.

↓ 5

↓ 6

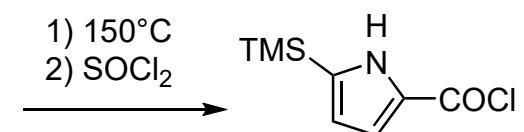

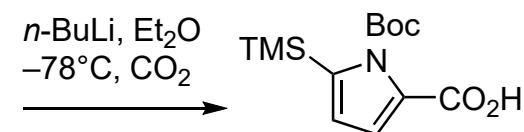

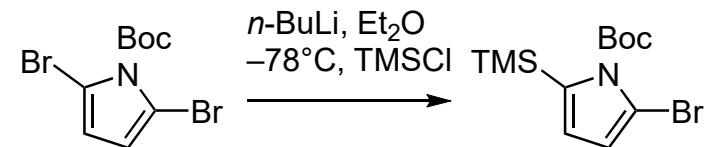

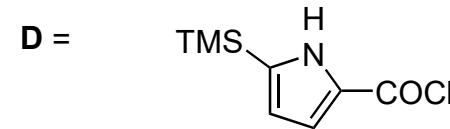

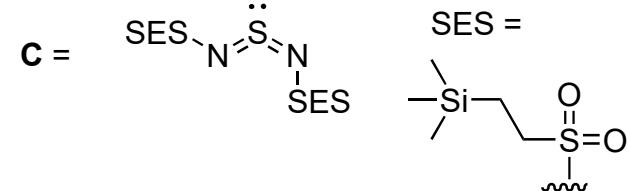

↓ 7

5) **C**, Benzene, 80 °C

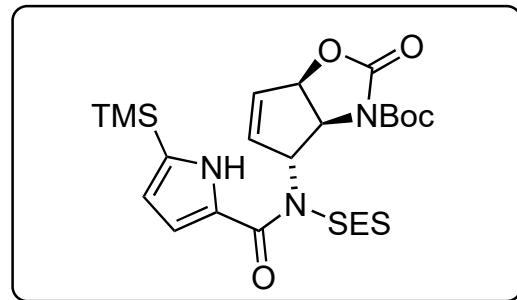

6) NaBH₄ or P(OMe)₃, MeOH

7) **D**, DMAP, Et₃N, THF

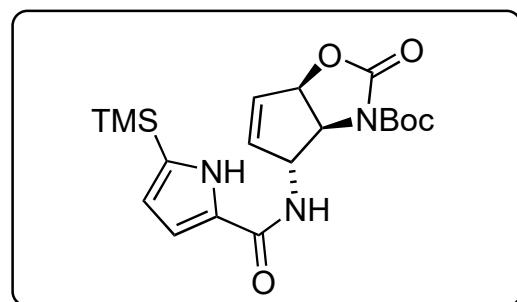

NOTE: If they say TFA for deprotection of Boc-group, question them on why this might be bad (Protodesilylation).

*Provide a plausible synthesis for **D** starting with pyrrole.*

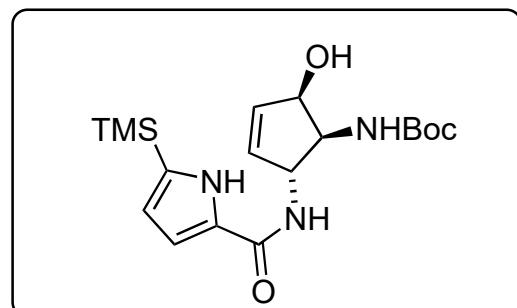

↓ 8

8) TBAF, THF

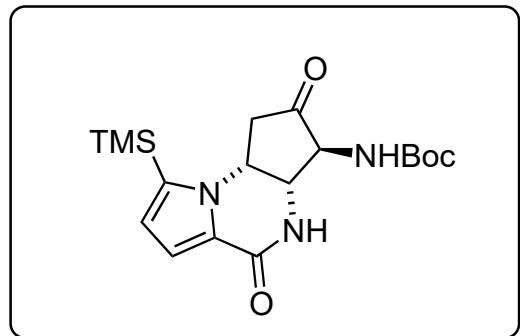

↓ 9

9) LiOH, THF, Water

↓ 10,11

10) PDC, DMF
11) Cs₂CO₃, MeOH

↓ 12, 13, 14

- 12) NBS, THF
- 13) TMSI, DCM
- 14) MeNCO, NaOH, H₂O
