6)

7)

8)

9)

10)

11)

12)

3) Name of the reaction?

Tsuji-Trost

4) Name of the reaction?

Krapcho decarboxylation

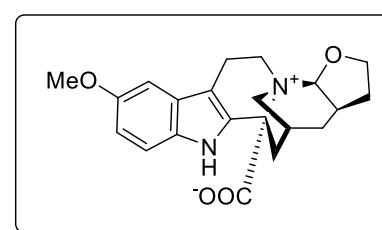

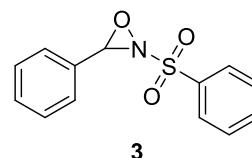

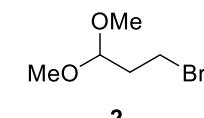

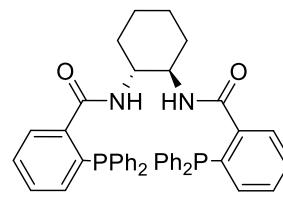

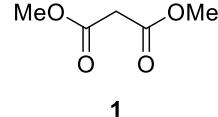

10) A side reaction occurred when using acidic condition. Which one? Role of NEt<sub>3</sub>?

Intramolecular Prins reaction

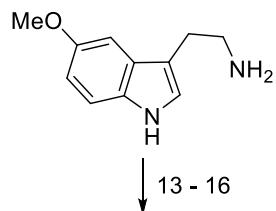

Quench excess of TESOTf

11) Name of the reagent?

Davis oxaziridine

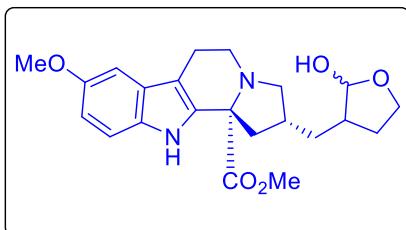

Voacafiricine A

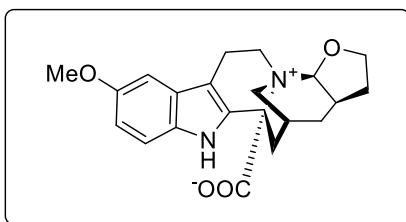

- 13) **B**, benzoic acid, reflux
- 14) HCl (aq, 4N), MeOH
- 15)  $K_2OsO_4 \cdot 2H_2O$  (4mol%),  $NaIO_4$
- 16)  $NaBH_3CN$

- 13) Name of the reaction?  
**Pictet-Spengler reaction**
- 15) Name of the reaction  
*Hint:* 3 cycles are formed  
**Lemieux-Johnson**

**C**

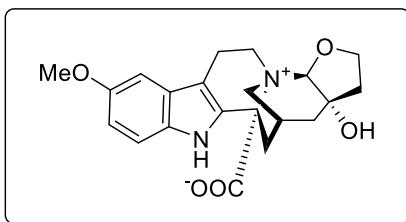

↓  
17

**Voacaficine A**

**C**

↓  
18 - 20

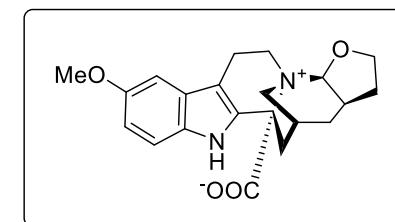

**Voacaficine B**

- 17)  $MsCl$ ,  $NEt_3$  *then* sat.  $Na_2CO_3$  (aq)

- 18)  $MsCl$ , DIPEA
- 19)  $K_2OsO_4 \cdot 2H_2O$  (4mol%),  $NMO \cdot H_2O$
- 20)  $MsCl$ ,  $NEt_3$  *then* sat.  $Na_2CO_3$  (aq)

- 18) *Hint:* No cyclization
- 19) Name of the reaction?  
**Upjohn dihydroxylation**

**Voacaficine A**
