Ukrainian as a Foreign Language: Exploring Cultural and Historical Aspects Through Memes

Vortrag in ukrainischer Sprache

The presentation justifies the relevance of using memes in teaching foreign languages, focusing on their incorporation into teaching Ukrainian. Examples of tasks demonstrate the ability of memes to visualize material and contribute to the development of critical thinking, as well as the formation of students' linguistic, communicative, and socio-cultural competence. The emphasis is on the historical and cultural information in memes and their connection to contemporary events in Ukraine, particularly the Russian Federation's war against Ukraine.

Svitlana Pidoprygora, a professor of literary studies specializing in Ukrainian literature and culture, places particular emphasis on exploring Ukrainian visual media, including comics, memes, in her current research.

Organisation und Moderation: Magdalena Kaltseis (Institut für Slawistik & Institut für Fachdidaktik)

Eine Vortragsreihe des Osteuropazentrums gemeinsam mit dem Institut für Slawistik
