

My Abstract for Obergurgl 2024

F. Author^{*1}, **P. Author**^{†2}, **L. Author**^{1,2}

1. Institute for Theoretical Physics, University of Innsbruck, Technikerstraße 13a, 6020 Innsbruck, Austria

2. Atominstitut, Tu Vienna, Stadionallee 2, 1020 Vienna, Austria

Lorem ipsum and some more blind text. This template has been inspired by the 52nd EGAS book of abstracts template. The conference was held virtually in July 2021 in Zagreb. References should appear at the end of the abstract, in the order in which they are referenced in the body of the text. Please refer to the examples below for the presentation of the references. They can be cited like this [1].

Fig. 1: This is the conference picture from 2022. One might not see it, but it was actually pretty cold when we took it.

You can, of course use all the standard \LaTeX packages to write equations, such as

$$i\hbar\partial_t\Psi = H\Psi, \tag{1}$$

and, even tables are possible as seen below. But, please make sure you adhere to the strict limit of one page in A5 format as specified.

Table 1: Weather conditions at Obergurgl, actual situation may vary.

Skiing Conditions		
Monday	clear	-10°C
Tuesday	clear	-11°C
Wednesday	overcast	-14°C
