
NFB: *A Crude Awakening*

In ***A Crude Awakening***, our civilization's addiction to oil puts it on a collision course with disaster. Compelling, intelligent, and highly disturbing, the film visits with the world's top experts and comes to a startling but logical conclusion – our industrial society, built on cheap and readily available oil, must be completely re-imagined and overhauled. The world's oil supplies are peaking and the crisis of global shortage looms; we are running out of oil and we don't have a plan.
