**Poetry, Medicine and Science: Research Projects on
Neo-Latin Literature and their Spanish Context**

Thursday, 15.01.2015, 18:00

Zentrum für Alte Kulturen („Atrium“, Langer Weg 11, SR 2)

The main subjects of Joaquín Pascual's talk will concern the Neo-Latin poems written for literary contests in 16th-century Spain, and a treatise on the ancient gods worshiped in Hispania written by Rodericus Carus in Latin in 1642. Teresa Santamaría will be talking on the research project that she leads for the recovery of the written heritage of the European Medicine, including the edition, translation and study of Álvaro de Castro's *Fundamenta medicorum*. We shall also outline the Neo-Latin Projects undertaken in our country.
